Annual Project Closing Report
STREAM IMPROVEMENT OPERATION AND MAINTENANCE
DAGGER FALLS AND SELWAY FALLS FISHWAYS

Project No. 28272400 Contract No. 03-4-208-00012

Columbia River Fisheries Development Program

May, 1975

STREAM IMPROVEMENT OPERATION AND MAINTENANCE
DAGGER FALLS AND SELWAY FALLS FISHWAYS

Statement of Accomplishments

The Dagger Falls Fishway on the Middle Fork of the Salmon River was cleaned of accumulations of rocks, gravel and debris. This is a continuing requirement and is necessary on a semiannual basis to insure that fish passage can be maintained on an uninterrupted basis.

The Selway Falls Fishway on the Selway River in the Clearwater, River Drainage was cleaned prior to the high water in the spring of the year. The vertical slots in the fishway are easily plugged with logs, brush and gravel. The fishway exit was slightly modified to improve the debris rack. This should offer some improvement, but the only solution at this time appears to be frequent inspections and cleaning of the fishway.
